

Feed-in tariff for households

On 25 August 2015 the Resolution No. 2046 of the National Commission for State Energy and Public Utilities Regulation dated 20 July 2015 became effective. The Resolution establishes the amount of feed-in tariff for households, which produce electricity from solar or wind energy by means of electricity facilities with capacity of up to 30 kW.

The feed-in tariff for households that generate electricity from solar energy by means of electricity facilities mounted (installed) on roofs and/or facades of households (houses, buildings and premises) depending on the commission date of electricity objects is as follows (in UAH, without VAT):

Commission date	Feed-in tariff
01.04.2013-31.12.2014	8.5716
01.01.-30.06.2015	7.7093
01.07.-31.12.2015	4.7877
01.01.-31.12.2016	4.5432
01.01.2017-31.12.2019	4.3244
01.01.2020-31.12.2024	3.8868
01.01.2025-31.12.2029	3.4621

The feed-in tariff for households that generate electricity from wind energy depending on the commission date of electricity objects is as follows (in UAH, without VAT):

Commission date	Feed-in tariff
01.07.2015-31.12.2019	2.7800

01.01.2020-31.12.2024	2.4968
01.01.2025-31.12.2029	2.2266

It is worth mentioning that the National Commission for State Energy and Public Utilities Regulation quarterly converts the feed-in tariff (which is fixed in euro) into national currency on the basis of the average official currency rate of the National Bank of Ukraine.
