

About us

DOING BUSINESS IN UKRAINE MADE SIMPLE

Our law firm offers a combination of highly qualified attorneys who have built up their experience over many years in a variety of international offices. Our experts are held in high esteem in professional circles thanks to their expertise on the special features of doing business in Ukraine. This, together with the analytical data obtained by our law firm, has made a major contribution to the compilation of periodic overviews and comparative legal studies by international financial institutions over the past several years.

Our team is multilingual. Most of our experts graduated from a Ukrainian law university and successfully continued their studies abroad, in Germany and England in particular.

This means that our attorneys understand not only our clients' needs, but also their mentality and the peculiarities of their respective business models. Legal and tax advice is a business relationship built on trust and this is a significant advantage for our clients.

Our core customers are SMEs from various fields. We offer them tailor-made and economically viable solutions. We are also a reliable business partner for a number of listed corporations and their subsidiaries in Ukraine.

Our individual approach to our clients' ambitious tasks calls for a trusting relationship with us. This forms the foundations for a long-term partnership.
